

PERMALOC[®]

StructureEdge[™] Aluminum Paving Restraint

PermaLoc Corporation is proud to introduce PermaLoc StructureEdge. For several years, Specifiers and Installers have been requesting a permanent paving restraint system that would be easier to install and out-perform plastic, P.V.C. and steel systems. StructureEdge is designed for the areas where hardform and natural landscape meet.

Designers tell us that these areas are the most difficult to retain, although well defined on paper, their clarity is often lost to the realities of time and ongoing maintenance. We are confident that PermaLoc StructureEdge will exceed your performance expectations.

- Reversible Design
- Patented Interlocking Snap-Down Splicing System
- Rapid Permanent Installation
- Aluminum Eliminates Rusting, Cracking & Rotting
- Strong "L-Shaped" Design
- Safe and Aesthetic
- Designed for Curvilinear & Straight Applications
- Easily Maintained with Power Landscape Edgers
